

# NEWGENE COVID-19 ANTIGEN TEST KIT

## FEATURES

True COVID-19 antigen test capable of detecting the presence of viral antigens in nasal, nasopharyngeal or sputum samples within 15 minutes.

Based on the results, the Belgian Federal Agency for Medicines and Health Products has decided to authorize the distribution of the NEWGENE COVID-19 antigen detection kit.

Thanks to the NEWGENE COVID-19 antigen detection kit, which has excellent specificity, it is therefore possible to obtain a sample in a non-invasive manner and, therefore, save precious time, allowing rapid treatment of the patients detected positively.
