PROTECTION TO SURPASS
INDUSTRY EXPECTATIONS

PW362 458

T620 140

T604 458

Portwest All Weather Protection is engineered with exceptional fabrics and designs, allowing an easy transition between work and leisure. Tested to withstand the rigours of everyday wear, each garment has been designed and manufactured using the best quality materials and high technology construction techniques to ensure total satisfaction with wear after wear.

Portwest DX4™ combines all the technical features required to guarantee extra protection against the elements. This collection combines high performance stretch fabrics with stunning design to create our most innovative range so far

Portwest KX3™ is a superior line of trend-led apparel combining quality construction to the highest standards and technical expertise. Designed with a premium water resistant fabric finish to allow water to bead away from the fabric surface

Portwest WX3™ technical stretch all weather protection balances comfort, versatility and aesthetics. Designed to the highest standards, WX3 styles offer superior dry working comfort

Portwest PW3™ premium high performance rainwear is designed to deliver maximum performance and protection. Utilising premium fabrics, this range offers exceptional protection and comfort

PW2™ is the latest evolution of workwear by Portwest. This versatile collection has been specifically designed to allow for overbranding and can be easily customised. Corporate logos can be applied to the large panels in key visibility areas enhancing brand identity.

Portwest PWR collection is constructed from Portwest Extreme, a premium high performance waterproof and breathable fabric. Using state-of-the-art technology, the base fabric has been engineered to provide a technical barrier against the elements.

The Sealtext™ range of fabrics are constructed using high technology coated fabrics on a flexible highly tear resistant 100% polyester tricot knit. The welded seams used on all Sealtext garments ensure rain and wind are locked out and the durable, stretchy fabric can easily be wiped clean so Sealtext garments look good and last for longer.

The Iona™ Collection offers functionality, added visibility and waterproof protection. These garments are certified to the waterproof standard EN 343 (Class 3) and enhanced visibility protection standard EN 17353.

Ripstop is constructed using 100% polyester, PVC coated ripstop fabric. The polyester fabric combined with the Ripstop pattern provides an extremely strong yarn that is highly durable and tear resistant. The tough outer shell guarantees outstanding waterproof protection at all times.

FABRIC INFORMATION

Made with 300 Denier 100% polyester yarn, this is a tough fabric for tough conditions. 300D fabric has superb abrasion and tear resistance. The polyurethane (PU) coating on the inside makes the fabric durable and waterproof, and the outer has a water and stain repellent coating which helps keep the garment clean.

RAIN JACKET AND TROUSER

FABRIC INFORMATION

Constructed from a highly breathable, high technology, PU coated fabric, on a flexible 100% polyester tricot knit, 180g.

GARMENT BENEFITS

Sealtex AIR incorporates exceptional levels of waterproof, windproof and breathable properties. The high frequency welded seams guarantee full protection against adverse weather conditions whilst the durable, supple and lightweight fabric ensures maximum comfort and ease of movement.

Navy S-3XL

LIGHTER, BREATHABLE AND MORE FLEXIBLE

RAIN JACKET AND TROUSER

FABRIC INFORMATION

Constructed using 95% PVC, 5% PU, 310g. Sealtex Ocean is very soft and extremely flexible. It does not have the rigid stiffness usually associated with PVC blend fabric. This fabric is tested and proven to be highly water resistant. It has an additional tricot knitted backing for maximum wearer comfort.

GARMENT BENEFITS

The superior quality of these garments provides a robust, high calibre range that caters to our customers requirements, whilst also maintaining unbeatable value. Additionally, high frequency welding ensures all seams are waterproof in extreme wet weather conditions.

RAIN TROUSER

FABRIC INFORMATION

Sealtex Classic is a high technology, PU coated fabric, on a flexible, highly resistant 100% Polyester tricot knit, 200g. Sealtex Classic fabric is tested regularly to ensure it meets and exceeds EN343 waterproof standards. Independent test houses carry out hydrolysis and hydrostatic testing. Sealtex Classic consistently achieves top results in these tests.

GARMENT BENEFITS

This exclusive range is guaranteed to keep the wearer dry in the most adverse conditions. The welded seams ensure rain and wind are locked out and the durable, stretchy fabric can easily be wiped clean, allowing Sealtex garments to look good and last for longer.

HEATED JACKET

Heated jackets are constructed using innovative carbon fibre technology, featuring three panels on critical points of the body. Each jacket includes a 10,000MA USB rechargeable battery that powers the heat technology (3-4 hours charging required). The built in controls allow the wearer to switch between three settings of heat; high, medium, low. The heated panels will give temperatures between 25-45C and can last up to 10 hours, depending on setting.

PW3 FLEX SHELL

Portwest PW3 Flex Shell fabric is the latest evolution of soft-shell fabrics to deliver maximum performance and protection from the weather. This highly durable 3-layer laminate fabric is water repellent and windproof with a stretch finish. Incredible suppleness offers outstanding user comfort. With low weight to high warmth ratios, the soft mesh inner face feels dry and comfortable next to the skin during extended periods of wear.

FABRIC INFORMATION

Constructed from 100% Breathable Polyester, Oxford weave, with a Stain Resistant finish, 150g. The fabric is lined with 100% Polyester with a thermal interlining, 300g for extra warmth and comfort.

GARMENT BENEFITS

For the best protection in the most hostile conditions, look no further than this outstanding collection of ColdStore garments. Our designers have worked with trial groups to develop a unique collection that is above all warm, practical and comfortable to wear. Performance is a key requirement, along with a garment that maintains heat without being bulky and heavy.

SILVER ION TREATMENT REDUCES ODOUR

BASE LAYER

Baselayer garments are made from a 100% Wicking Polyester which draws moisture away from the body keeping the wearer cool, dry and comfortable under exerting conditions. The garments are suitable for all levels of activity and can be worn as an extra thermal layer for workwear in cold weather or as a technical sports garment for added comfort and enhanced performance.

PORTWEST® COOLING 360°

CV04
528

CV02
527

THE LATEST IN COOLING TECHNOLOGY

This innovative range offers a comprehensive selection of products to help minimise the risk of heat stress and UV rays. Outdoor workers in construction, agriculture, mining, oil and gas and other industries frequently find themselves working in temperatures up to and over 40°C/100°F. This Cooling range is ideal for use in these conditions.

FABRIC INFORMATION

Portwest evaporative cooling products are constructed from Cooling 360° Fabric Technology which uses a unique polymer chemistry. Simply activate by soaking in water creating a chemical reaction within the fabric which enables the garments to act like a sponge; retaining water, keeping the body cool in hot weather conditions.

STEP 1

SOAK IN COOL WATER FOR 1-2 MINUTES

STEP 2

SQUEEZE OUT EXCESS WATER

STEP 3

KEEP COOL FOR UP TO 8 HOURS

THE GARMENT WILL REMAIN HYDRATED FOR SEVERAL HOURS TO REACTIVATE REPEAT STEPS 1, 2 AND 3
